

Executive Display Phone

THE NEXT GENERATION OF DIGITAL COMMUNICATION

Utilizing a powerful menu interface, the Executive Display Phone is not just for executives, but anyone who desires efficient call-processing capabilities. The large 6-line by 16-character, alphanumeric liquid crystal display (LCD) leads you through system features and capabilities—serving as a built-in user guide.

The first two lines of the LCD provide standard call information such as:

- ▶ Date and time
- ▶ Numbers dialed
- ▶ Call cost data
- ▶ Reminders
- ▶ Incoming calls—take the ones you want, let voice mail take the others

The remaining four lines of the LCD on the Executive Display Phone (not available on Standard Display or Basic Digital Phones) correspond to menu feature keys located along each side. These menu-driven, one-touch “soft” keys reduce the time required to make and receive calls, retrieve messages, leave messages and access features. You spend time doing productive work, not trying to figure out how to use the phone.

Optional Data Port Modules allow you to connect your PC to Axxess features and services as well as connecting the Executive Display Phone to any data device.

IN OTHER WORDS...

When a call rings in, your phone screen provides the options for handling the call. While you are in voice mail, the screen gives you options for managing your messages. The dynamic screen prompts you with available options for every situation, allowing you to process your calls with the touch of a button.

Executive Display Phone

FEATURES

- ▶ 6-line X 16-character alphanumeric LCD with "soft" key prompting
- ▶ LCD integration with Axxess Voice Processing Unit
- ▶ 8 "soft" menu-driven keys
- ▶ 23 programmable keys
