

Standard Display Phone

YOUR COMMUNICATIONS WORKHORSE

Building on the features of our Basic Digital Phone, the Standard Display Phone incorporates a 2-line-by-16-character alphanumeric liquid crystal display (LCD) to provide the information you need to enhance productivity. The LCD provides date and time, numbers dialed, call cost data, reminders, messages and much more.

For those in your organization who have moderate to heavy phone responsibilities, the Standard Display Phone is the perfect tool. With a total of 23 programmable keys, you can truly customize the functionality of this digital phone to maximize efficiency and ease of use. Optional Data Port Modules allow you to connect your PC to Axxess features and services as well as connecting the Standard Display Phone to any data device.

Use a built-in speaker and microphone to answer intercom calls hands-free and take advantage of on-hook dialing. The "hot" keypad provides user-friendly operation and greatly reduces the number of keystrokes needed to operate any function.

IN OTHER WORDS...

Moderate to heavy phone users will find the Standard Display Phone a valuable tool for increasing the efficiency and productivity of call processing. The liquid crystal display provides real-time messages and timely reminders as you navigate through your calls to give you the information you need to stay on top of your responsibilities. Programmable keys allow you to customize the functions and operation of your phone to best match your work style and flow.

Standard Display Phone
