

Call from your desk phone

NEC's innovative desktop endpoint design is intended to **deliver maximum deployment flexibility**. A wide range of choices allow for multiple combinations that fit any and all business niches or personalization requirements.

Reasons to choose SL2100 Telephones

- **Wide-Range of Choices** - choose from IP or digital, 12 to 32 keys or self-labeling, or digital and IP cordless mobile handsets
- **Customizable function keys** - can be adapted to the exact individual requirements of your business
- **User-friendly interface** - little or no staff training required
- **Gigabit built-in** – eliminates the need of having to buy an adapter, even on self-labeling telephones (Not available on all models)
- **Wireless headset adapter** - allows easy connection to Plantronics' wireless headsets

Personal, system and corporate directories

SL2100 Desktop Telephones come with **corporate directory functionality** along with access to personal and system directories as well. Users can quickly access these directories to easily reach the people they need. There's no need to waste time looking up phone numbers. Each entry in the directories is searchable, and a call can be placed from the searched entry.

Easy-to-use, intuitive interfaces

NEC's desktop telephone interfaces are **designed to improve the overall user experience**, while remaining intuitive – with no extensive training needed. Global icons indicate status at-a-glance, including notification of new voice or instant messages, missed calls, the telephone user's current presence status, and the device's current data protection mode.

Unique customizable telephones

Our wide range of SL2100 Desktop Telephones are like no other. Their customizable construction means you can **change the design for exact business requirements**. Whether your employees need just a basic single line telephone or one with a 60-line console attached, NEC offers telephones to fit everyone's needs.
